American Hose MiniKrimp Package Special

At just 35 pounds, the new MiniKrimp™ is the lightest and fastest low-cost portable crimper made. Giving you factory-style assemblies on the job site or in the plant in seconds. Fix it here. Fix it there. Fix it faster. MiniKrimp has been designed to go where the job is. At just 15.5" high x 7" wide x 5" deep, the machine has been sized for portability, while its light weight makes it easy to lift and carry. With MiniKrimp, there's no electricity needed or gauges to set. MiniKrimp carries a self-contained power unit on the side. An optional hose assembly allows users to remove and reposition the power unit if desired. Easy to operate. Like other Parker crimpers, the MiniKrimp is easy to set up and operate. Our exclusive Parkalign™ feature positions the coupling correctly every time. Color-coded dies prevent mismatching, while our unitized die train keeps segments in place. Optional mounting: MiniKrimp capabilities include: • Parflex thermoplastic hose sizes -2 (1/8") thru -16 (1") • Parflex steel fittings up thru 1"; stainless up thru 3/4" • Hose Products rubber hose thru -20 (1-1/4") • Hose Products steel 43 Series fittings thru 1-1/4".
